

Your vision our future

Composite Decking

RESISTANT TO ALL WEATHER CONDITIONS

Solideck® provides construction materials that are low-maintenance, rot proof, and resistant to all weather conditions. This unique composite material also creates safe anti-slip, splinter-free structures perfect for any outdoor environment. Solideck® is ideal for the value conscious consumer who also wants a luxurious product with timeless appeal.

SUSTAINABLE AND ENVIRONMENTALLY RESPONSIVE

This environmentally friendly product is 100% recyclable and its use help preserve our natural forests. Our modern manufacturing facility is designed with “state of the art” equipment allowing us to efficiently produce a high-quality product with minimal environmental impact.

DECK

SOLIDECK® COMPOSITE DECK IS A DURABLE, COST EFFECTIVE, AND SAFE OUTDOOR FLOORING SOLUTION.

Products made from Solideck®, a unique blend of PVC, wood fiber and other proprietary components are an elegant, cost-effective, durable and safe alternative to wood for both residential and commercial outdoor recreational areas. The lifespan of wood is limited when exposed to moisture and insect damage. Wooden decks require chemical treatments to maintain appearance and structural integrity. Screw heads pop out over time and required maintenance generates extra cost and takes time away from your fun and relaxation. In addition, the safety of wooden structures can put friends and family at risk with splintered or slippery surfaces.

HIDDEN FASTENERS & ELECTRICAL WIRES

The unique “groove and groove” design of Solideck® decking systems presents a clean, unobstructed profile that enables proper drainage. All installation is completed using hidden fasteners made of stainless steel. Our special design also allows unsightly electrical wires to be hidden inside the decking and the posts. The combination of these features provides the appealing appearance of a high-quality product.

SAFETY

We believe in safety. Our products have been thoroughly tested in several countries for load bearing limits, flammability, fade and slip resistance. Our decking products are Class 3, the highest anti-slip rating awarded. These properties make Solideck® ideal for pool surrounds, docks, terraces and other landscaping projects. No more worries about popped screw heads or splinters. Solideck® is the safe answer to all of your project needs.

OUR GUARANTEE

Your investment is protected by our 20 year limited warranty. Solideck® products will be free from material defects in workmanship and materials and will not splinter, rot or suffer structural damage from termites or fungal decay.
